## Announcement

**WILMINGTON, DELAWARE, December 10, 2025** - SquidSpark Inc. announced the opening of its U.S. operations in Delaware, establishing a platform to support American clients, vendor relationships, and cross-border technology delivery.

The Delaware presence allows SquidSpark to serve clients that require U.S. contracting, billing, and operational support while maintaining its Canadian roots and technical delivery standards.

SquidSpark's U.S. operations will focus on cloud modernization, secure workplace enablement, AI-assisted product development, data platforms, and digital presence solutions for small and mid-sized organizations.

The expansion also improves SquidSpark's ability to work with U.S.-based technology partners and support clients that operate across both Canadian and American markets.

## Executive Quotes

"Opening in Delaware gives us a structured U.S. presence and makes it easier for American clients and partners to work with SquidSpark as we scale across North America."

**Frederick Young**  
Chief Operating Officer, SquidSpark

"A U.S. operating footprint helps us support deployments, integrations, and vendor coordination for clients whose technology environments cross borders."

**Chun-Hao Chang**  
Chief Technology Officer, SquidSpark

## About SquidSpark

SquidSpark helps organizations modernize with strategy, development, AI, data, cloud, security, digital presence, and productivity solutions.
